**Early Career Researcher Networking Session**
**Tuesday 14th December 2021**

**Hosted by:** Preventing Overdiagnosis Early Career Researcher Group (Arnav Agarwal, Brooke Nickel, Chloe de Grood, Frederik Martiny, Jennifer Yammamoto, Jolyn Hersch, Julian Treadwell, Keltie Hamilton, Kristen Pickles, Leshia Hansen, Matthew Wang, Patrick McLane, Pedro Kikushima, Wynne Norton)

Overdiagnosis is a growing field, and connecting with like-minded colleagues and mentors with experience in the area is integral for early career researchers.

This virtual networking session will be hosted by the PODC Early Career Researcher group with key members of the Scientific Committee with expertise in overdiagnosis.

The session will be comprised of smaller breakout room sessions, where participants will rotate through and meet meet experts and other early career researchers from around the world.

The aim of this event is to connect more early career researchers interested in the field of overdiagnosis, and to connect them to well-established researchers in the field for ongoing mentorship and collaboration.

The event will be 90 minutes in length.

**Learning objectives:**
1. Review personal and professional objectives relevant to overdiagnosis, and shared them with other early career researchers and experienced researchers in the area.
2. Recognised the principles of peer collaboration, and mentorship regarding personal and professional career goals.
3. Identified opportunities for possible ongoing mentorship and collaboration with like-minded researchers and mentors internationally.
